

Dealership Staff Messaging

With the **Dealership Staff Messaging** sub-module, you can improve communications with staff members by sending internal voice broadcast messages between departments, committees, select individuals or globally. The

Dealership Staff Messaging sub-module allows administrators to record and send voice recorded or text-to-speech messages directly to the mail boxes of staff members within an internal messaging campaign. The administrator can also choose to be notified each time a staff member has retrieved the voice broadcasting message within their own mail box.

We take technology to task.™
